We will be stronger with YOU

The workshop will focus on Deaf-hearing teaming and will begin with discussions on current research and practices of Deaf Interpreter-hearing teaming processes. The traditional view of Deaf-Hearing teaming processes and the evolved view will be discussed. Also, there will be a discussion on gatekeeping theories and techniques on how they apply to team interpreting processes, and how research has redefined gatekeeping within the Deaf and hearing interpreter teams. A case will be made that there is a need to move away from current teaming practices, especially within the teams to allow interactive dialogues. Research-based examples from videos will demonstrate how the DI-HI as well as hearing-hearing interpreter teams are gatekeepers for effective interpretation. There will be demonstrations and group activities. Friday 0.2 Professional Studies, Saturday 0.6 Professional Studies (pending RID approval). Both days or individual day CEU's available.
